(647)-929-4110 | rizvi-zain@hotmail.com

Computer Science student at the University of Ottawa with hands-on technical support experience at York Region. Skilled in programming, system design, and database management, with strong problem-solving abilities. Proven track record in improving IT operations and delivering user-focused solutions. Team-oriented, with excellent communication skills and a passion for software development. Seeking an internship for Winter 2026 to further develop technical and leadership skills.

EXPERIENCE

York Region, Service Desk Co-op | May 2024- Aug 2024 & May 2025 – August 2025

- Delivered first-level technical support, resolving hardware and software issues to minimize downtime.
- Installed, configured, and troubleshooted desktops, laptops, and mobile devices.
- Reimaged devices for consistent end-user setup.
- Documented recurring issues in the knowledge base to improve future resolution.
- Managed ticketing system to prioritize and track incidents.
- Collaborated with IT teams to enhance processes and customer service.

Director of Academic Affairs for the CSSA | September 2023 - May 2024

- Organized events, including a Nokia office tour, and led student outreach efforts.
- Gained teamwork, leadership, and event coordination experience.

EDUCATION

University of Ottawa | Sept 2023 - Dec 2028

Honours BSc Computer Science Co-Op

PROJECTS

Personal Portfolio Website & CI/CD Pipeline - zainrizvi9.github.io

- Developed responsive portfolio using HTML, CSS, and JavaScript with automated deployment pipeline
- Built CI/CD system using AWS EC2, Nginx, Node.js webhooks, and GitHub integration for automatic production deployments
- Configured cloud infrastructure, security groups, and server management

MERN Expense Tracker (Full-Stack Web App) - mern-expense-tracker-red.vercel.app

Live Demo (Hosted on Vercel – backend may take a few seconds to load)

Demo Video -

https://drive.google.com/file/d/19hNIn-WBJ8zgREzBrpb_qP67v5KpL4ki/view?usp=sharing

- Developed a responsive personal finance tracker using React.js, Node.js, Express, and MongoDB Atlas.
- Built secure REST APIs for income and expense management with form validation, CRUD operations, and JWT authentication.
- Integrated Recharts for data visualization (monthly income/expense trends) and implemented Excel download via Blob handling.
- Used Axios, React Context API, and Tailwind CSS for a modular front-end architecture and clean UI design.
